

## Parallel

*Design: Victor Vasilev*

### *Description*

Parallel is a high-end collection of table and floor lamps that was created from a desire to present the market with an exclusive product that could appeal to a range of tastes and be used in a variety of spaces, from the very classic to the most contemporary and austere.

Parallel consists of a cylindrical metal lampshade supported by a vertical stem positioned laterally. The stem has two metallic plates that are spaced apart and slide in parallel directions from the base to the lampshade. What makes Parallel unique is the lampshade, which has been covered on the outside with hammered leather that comes in two different shades. This is the first time that Oluce has used leather in a collection of lamps, and this shows its ability to explore new solutions and to continue to remain innovative.

Attention to detail, an original visual and tactile perception make Parallel a modern, highly geometric lamp that has a place in a range of design settings and can satisfy the most diverse style needs. Made in Italy.

### *Dimensions*

Ø11"3/8 x 20"H - Cod. 296

**Light source:** 1x max 25W E26 (LED) - With bulb - Universal dimmer

### *Finishes & Materials*
