

Yolk

Design: Angeletti & Ruzza

Description

Yolk is a contemporary designer lighting fixture that plays with irony and lightness. The project revolves around the concept of duality, expressed through the combination of metal and glass—two contrasting materials that both reflect and diffuse light with refined harmony.

Its name evokes the essential form of the egg, symbol of generative power and simplicity, while also embodying the creative synergy of the design duo. With its sophisticated balance and luxury lighting design appeal, Yolk transforms an everyday reference into a distinctive and elegant statement piece for luxury home lighting environments. Made in Italy.
