

# Hula

*Design: Roberto Giacomucci*

## *Description*

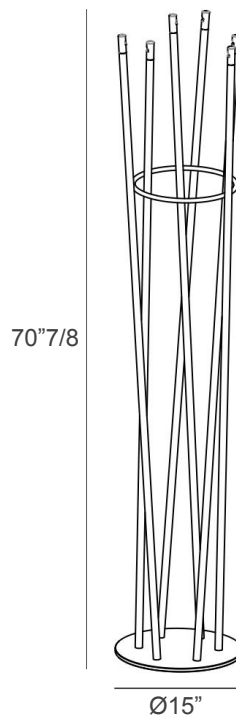

Hula is a sculptural coat hanger defined by a striking composition of slender metal rods that taper gracefully and intersect at the top, forming an elegant and dynamic silhouette. Its refined geometry and contemporary aesthetic make it a distinctive piece that enhances both residential and contract environments.

Blending functionality with design artistry, Hula transforms a practical object into a luxury designer home accessory — a statement of modern Italian home decor and upscale home design. Perfect for entryways, offices, or boutique interiors, it brings style, sophistication, and harmony to any space.

Made in Italy.
