

## Akeru

*Design: Giuseppe Viganò*

### *Description*

The Akeru sideboard embodies a perfect harmony of functionality and elegance, part of a luxury furniture collection where architectural balance meets refined craftsmanship. Its structure in canaletta walnut and its marble top create a dialogue between natural warmth and sculptural sophistication.

At the center, an open compartment—crafted in either marble or wood—becomes the visual focal point, adding a distinctive architectural detail that defines its contemporary furniture character. The addition of an optional clear glass box offers a refined way to personalize internal organization, while the two side doors with push-pull opening and recessed handle, conceal compartments with glass shelves, blending modern luxury furniture design with practical storage. The Akeru sideboard is a designer furniture piece that elevates interiors with understated luxury and timeless appeal. Made in Italy.
