

## Bellagio

*Design: Amini Studio*

### *Description*

Bellagio are rugs preserving a classic organic pattern inspiration finding a perfect collocation in contemporary ambiances thanks to the use of monochrome and ton-sur-ton color combinations. Chromatic versatility becomes the key element of this exquisite new line of rugs made in viscose and wool, whose three-dimensional features are specially interweaved by skilled artisans. The surface movement is given by both the weaving at different levels and the changing materials, which create lights and shades that show and then again hide the decorations. Made in Italy.
