

Nostalghia

Design: Elisa Ossino

Description

A metaphysical atmosphere, a silent architecture suspended in time, like a submerged city that appears below the surface of the water. In the Nostalghia rug by Elisa Ossino, the two-dimensional design evokes, through its combination of shapes and colors, the three-dimensional complexity of reality. Nostalghia is made in ecological cotton of extraordinary texture and unbeatable lightness, as if the tactile experience seeks to contradict the visual impression. Made in Italy.
