

Teorema Hybrid

Design: Elisa Ossino

Description

Ideal interpreters of the Contemporary line, Teorema is a collection of rugs with a strong graphic and conceptual approach, designed by Elisa Ossino. The protagonist of the project is the aim to achieve three-dimensionality, suggested by the precise combination of primary geometric figures. Counterpoints and echoes between rounds and angles, curves and straight lines create overlapping and transparency suggestions. Teorema rugs are made in India with wool and tencel yarns, enhanced by the hand-tufted fleece chiseled on two levels. Made in Italy.

TECHNICAL INFORMATION

Pile composition: 50% wool, 50% tencel

Height: 5/8" (18 mm)

Technique: Hand Tufting

Origin: India

Finishing: Two levels pile.

The rugs are hand washed, clipped and carved.
