

Bo

Design: Philippe Starck

Description

Stackable chair (up to 8 pieces) crafted from a durable technopolymer monoblock, available in a variety of contemporary colors. Designed for indoor and outdoor use, it offers versatility, comfort, and modern appeal. Sold in sets of four chairs in the same color, ideal for homes, terraces, cafés, and contract spaces.

Conceived by Philippe Starck, the Bo chair redefines the classic principles of stackable seating. Traditionally characterized by narrow front legs and rear legs positioned outside the seat, Starck transforms these structural rules into an element of aesthetic innovation. The design takes advantage of the natural widening where the seat transitions into the backrest, creating a fluid, sculptural silhouette that unites ergonomics and elegance. Made in Italy.

Dimensions

19"5/8W x 20"7/8D x 31"7/8H

Seat Height: 17"3/4
