

Coupelle

Design: Marie et Alexandre

Description

Coupelle was born from experimentation with industrial glass modeling using advanced thermoforming techniques. The transparent surface, reminiscent of the movement of water, amplifies the material's lightness and creates a refined visual effect.

Inspired by the architecture of Le Corbusier's Cité Radieuse, the design of this coffee table combines rigor and spontaneity in a simple, timeless form. More than a coffee table, Coupelle is an object blending sculpture and function, a piece capable of interacting with space and time. Made in Italy.

Dimensions

37"3/8W x 37"3/8D x 11"7/8H
