

Pip-e

Design: Philippe Starck

Description

Stackable chair (up to 4 pieces) made of a durable polypropylene monoblock, available in a wide range of contemporary colors. Reinterpreting the classic slatted chair, Philippe Starck gives it a distinctive and modern identity, blending functionality with design innovation. In Pip-e, the succession of horizontal slats forming the seat and backrest creates a striking chiaroscuro effect, seamlessly continuing along the inner curve of the knee for enhanced comfort and ergonomic support.

Versatile and lightweight, Pip-e is ideal for both indoor and outdoor use, combining elegance, practicality, and timeless appeal. Perfect for homes, terraces, cafés, or public spaces, it embodies Starck's signature balance of simplicity and sophistication. Made in Italy.
