

Otto

Design: Federica Farina

Description

Otto, designed by Federica Farina, is a luxury designer lighting fixture conceived as an elegant path-light with a soft, beguiling shape. A slim disc base supports a sleek cylindrical stem, topped by an adjustable semi-spherical head that houses the LED source.

Thanks to its innovative mechanism, the head can be inclined to direct the light beam in varying sizes, creating a versatile and functional yet refined lighting solution. Otto blends modern minimalism with luxurious lighting design, offering not only practical illumination for pathways and outdoor spaces but also a sophisticated decorative presence that elevates any environment. Made in Italy.
