

Tylsa

Design: Danilo Radice

Description

The Tylsa Bar cabinet introduces a refined and functional piece designed to elevate contemporary dining and living spaces. It maintains the collection's signature soft, rounded lines and expert woodworking craftsmanship, while enhancing the design's practicality and versatility. The cabinet features three storage compartments, alongside a large lower drawer. Inside, the central compartment stands out for its mirrored back panel, which visually expands the interior, and an integrated solid wood glass holder that ensures a well-organized bar setup. A back-painted glass top and a pull-out worktop upholstered in leather create a dual functional surface. Both the internal and external drawers are covered with leather, harmoniously coordinated with the top for a cohesive and luxurious aesthetic. Integrated LED lighting with a motion sensor illuminates each compartment. The recessed metal handles and metal base, enhance the modern and sculptural character of the piece while ensuring stability. Made in Italy.

Finishes & Materials

Upper Top: Wood or Marble.

Central Compartment Back Panel: Back-lit smoked mirror.

Central Compartment Cup Holder: Solid wood.

Inner Tabletop: Back-painted Glass.

Drawers Bottom & Pull-Out Tray: Leather covered.
