

## Toy

*Design: Philippe Starck*

### *Description*

Stackable armchair (up to 14 pieces) made of a durable polypropylene monoblock, available in a variety of colors. Designed for indoor and outdoor use, and sold in sets of four matching pieces. Designed by Philippe Starck, the Toy armchair embodies a bold, sculptural minimalism that merges art and functionality. Seemingly carved from a single block, its precise angles and broad planes create a distinctive, architectural silhouette that stands apart from conventional molded chairs.

Despite its geometric rigor, Toy offers unexpected comfort and striking visual balance, making it a statement piece suited to modern interiors, terraces, and public spaces alike. Its abstract form, combined with Starck's signature design clarity, transforms a simple armchair into a timeless object of elegant strength and contemporary style. Made in Italy.

### *Dimensions*

24"1/4W x 22"5/8D x 30"5/8H

**Seat Height: 17"**
