

Hope

Design: Paolo Rizzatto and Francisco Gomez Paz

Description

Hope is an exceptionally lightweight suspension lamp that reimagines the classic chandelier through modern materials and refined technology. Its thin methacrylate Fresnel lenses amplify and refract light, creating a sparkling, festive atmosphere with remarkable clarity and elegance.

Transforming traditional crystal elements into delicate petal-like shapes, Hope delivers the same dramatic, evocative lighting effects while remaining easy to assemble, adaptable, and visually airy. With its 4 different sizes, this designer pendant offers contemporary charm, radiant brilliance, and a striking decorative presence. Made in Italy.
