

# Mesh Wireless

*Design: Francisco Gomez Paz*

## *Description*

This suspension lamp elevates the iconic Mesh design with advanced smart-lighting technology, bringing unprecedented control and atmosphere to contemporary interiors. Its ethereal structure, an almost transparent network of flexible steel cables with LED sources positioned at each intersection, dematerializes in space, allowing pure light to become the true protagonist.

Equipped with an integrated wireless control system, Mesh Wireless lets users sculpt light with complete freedom. Through the dedicated Luceplan app for iOS and Android, individual LEDs or groups of light points can be activated, dimmed, or combined to create personalized lighting scenes. This intuitive system enables dynamic, versatile illumination, from soft ambient glows to dramatic, focused compositions. Crafted with polycarbonate lenses and advanced electronics, the Mesh Wireless suspension lamp offers a refined balance of innovation, aesthetic lightness, and high-performance LED technology. Made in Italy.

### **Light Source:**

Mesh 80: LED 75W 3094lm 2700K CRI 90. Dimmable Bluetooth/Wi-Fi. UL Approved.

Mesh 100: LED 60W 3777lm 2700K CRI 90. Dimmable Bluetooth/Wi-Fi. UL Approved.
