

Aire

Description

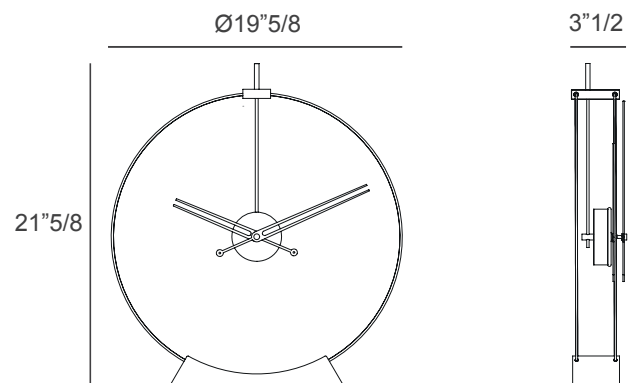

Aire preserves the poetic essence of Nomon's iconic ring designs while introducing a refined support that allows the piece to be beautifully displayed on console-style furniture. Crafted with walnut wood and accented by brass details, the clock strikes a perfect balance between organic warmth and contemporary shine.

Its sculptural composition and fluid geometry give it a unique visual lightness, transforming it into far more than a functional object. Aire becomes an expressive decorative piece, ideal for living rooms, studios, entryways, or elegantly curated corners that require a subtle yet impactful focal point.

Part of a collection celebrated for its avant-garde spirit, architectural presence, and distinctive character, Aire stands out as a unique design object for those who appreciate craftsmanship, innovation, and timeless modernity.
