

Tacón

Description

This model stands out for its avant-garde industrial design, where form and function merge into a striking architectural gesture. Its hands extend beyond the hour markers, (except for the “i” version) giving the composition a bold graphic presence and making the hands the true protagonists of the piece.

The installation can be adapted to the exact measurements required, offering full flexibility and allowing the clock to become a tailored designer element within the space.

Despite its expressive character, the clock preserves the brand’s signature simple, versatile, and sober lines, maintaining an elegant minimalism that suits both modern and contemporary interiors.

The lightness of its time signals creates the effect of an imaginary circle drawn on the wall, adding depth and sophistication. The result is a luxury, high-end, stylish object that brings originality, refinement, and a touch of chic industrial personality to any environment.

Finishes & Materials

Box & Time Signals: Brass.

Hands: Steel, Lacquered or Walnut wood.
