

Matics 2

Design: Gabriele & Oscar Buratti

Description

The Matics 2 is a highly versatile Italian-made storage element that adapts to various interiors. It can be configured open for a minimal look or fitted with Stopsol super silver clear glass doors for added refinement. Back panels come in wood, textured bronze metal, or Cuoio, allowing personalized combinations of texture and tone. Integrated LED lighting enhances the materials and creates a striking visual contrast, giving the piece both functional value and strong decorative impact within the collection.
