

# Osmose Rectangular Table

*Design: Patrick Jouin*

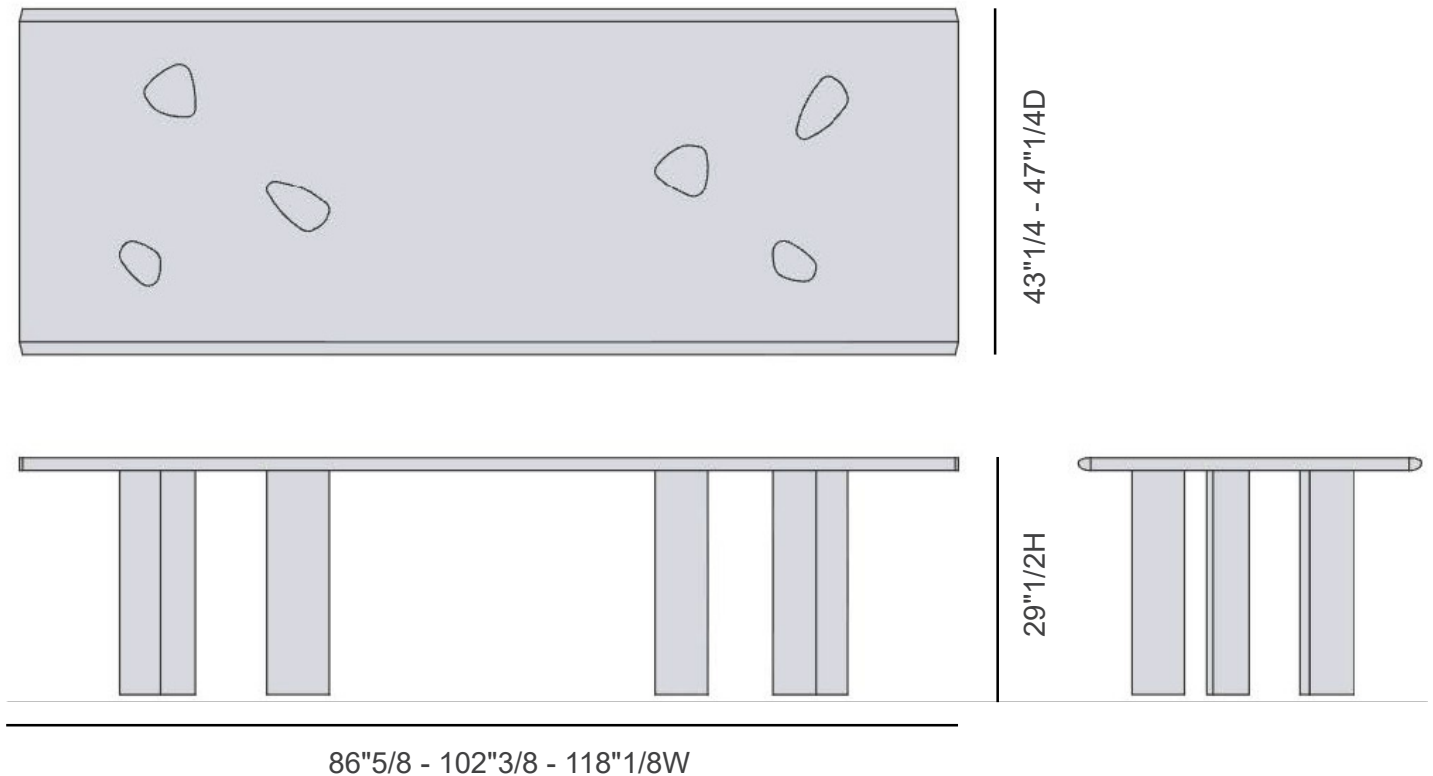

## *Description*

Osmose is the first dining table in the Porada collection to feature marble legs and is available in both rectangular and round designs. Crafted entirely from canaletto walnut, the table highlights solid wood contoured edges along the long sides of the rectangular version and around the full perimeter of the round version. The marble legs are placed differently depending on the shape and size of the table, giving the piece a natural and spontaneous look. Marble also appears on the top surface as soft, droplet-like inserts that align with the position of the legs, creating a visual rhythm across the wooden surface. The name Osmose refers to the idea of interaction and blending between materials, resulting in a distinctive and striking design. The rectangular version features a canaletto walnut top with shaped solid wood edges on the long sides, marble legs, and marble inserts matched to the leg finish and aligned with their placement. Made in Italy.
