

Alya

Design: Steve Leung

Description

The Alya lounge armchair with an exposed, sculpted frame in solid ash wood, defined by a sculptural weave that seamlessly integrates armrests and legs in a continuous gesture. The padded shell, in variable-density polyurethane, is upholstered in leather or fabric, with raised piping and a diamond-quilted backrest design. A refined yet essential silhouette, enhanced by artisanal finishes and rich material details.

Finishes & Materials

Cover: Fabric or leather.

Structure: Metal.
