

Elixir

Design: Alessandro La Spada

Description

The Elixir armchair is defined by a balanced interplay of materials and curves. The solid and multilayer wood frame supports a padded, upholstered seat, resting on beechwood legs with polished or satin metal tips. The armrests and backrest support, crafted from twisted, curved metal in a torchon pattern, add lightness and dynamism to the overall design.

Finishes & Materials

Cover: Fabric or leather.

Structure, Armrests & Feet: Metal.
