

# Bomber

*Design: R&D Dallagnese*

## *Description*

Bomber is a striking and contemporary table defined by its sculptural central base, composed of meticulously crafted metal rods that flare outward in a graceful and dynamic gesture. Each rod reveals an exceptional level of precision and artisanal expertise—an homage to the master iron-workers of the past—resulting in a base that is both structurally solid and artistically expressive.

Its round top, designed with clean and slender lines, enhances the table's airy presence while preserving a refined sense of balance. Available in a curated selection of premium materials and sophisticated finishes, the top can be tailored to complement a wide range of interior styles, from modern minimalist spaces to more luxurious and decorative environments.

For added practicality, the table can be equipped with an optional Lazy Susan. This elegant accessory elevates the dining experience, providing effortless sharing and enhancing its functional appeal.

Bomber stands out as a statement piece of luxury Italian furniture, blending contemporary design with artisanal craftsmanship. Perfect for dining areas, elegant kitchens, or stylish open-plan living spaces, it offers both visual impact and timeless functionality, making it an essential addition to any high-end interior. Made in Italy.

## *Finishes & Materials*
