

Eiffel

Design: Signorotto+Partners

Description

The Eiffel extendable shaped table offers the same sculptural beauty as its fixed counterpart while integrating an exceptionally refined extension system designed for modern homes. Its elongated top conceals two extensions positioned at opposite ends, preserving both visual harmony and ergonomic comfort during use.

Dallagnese's meticulous attention to detail shines in the bilia extensions, ensuring perfect aesthetic continuity with no visible interruption. The mechanism, discreetly housed beneath the surface in a sleek metal structure, allows for smooth, effortless operation, transforming the table from a sophisticated everyday piece into a spacious dining solution for gatherings.

Supported by Eiffel's iconic crossed metal blades, this version combines functionality, luxury craftsmanship, and contemporary elegance—making it an ideal option for interiors that require versatility without sacrificing beauty or design integrity.

Made in Italy.
