

Gulp

Design: R&E D Dallagnese

Description

Gulp is a generously proportioned and comfortable chair, designed to assert its presence with balance and refinement. Its finely crafted wooden base rests solidly on the ground, conveying stability and quality, while the gently sloped seat enhances ergonomic comfort. The chair can be upholstered in Fabric, Leather or Eco-Leather, offering versatility without compromising elegance.

The version with armrests elevates the chair's classic and sophisticated character. The enveloping backrest flows seamlessly into two high armrests, creating a confident, welcoming silhouette defined by soft volumes and clean, essential lines. This design enhances the sense of comfort and support while maintaining a light visual presence.

The armless Gulp upholstered chair is ideal for more compact interiors or for those who prefer a streamlined profile without sacrificing comfort. It retains the same refined proportions and inviting seat, making it a versatile solution for dining or living spaces where flexibility and elegance are equally important.

It provides versatile customization options, offering a single-color version or a two-color version that allows the external cover to feature a distinct finish from the internal cover. Made in Italy.
