

Katana

Design: Signorotto+Partners

Description

The Katana cupboard reinterprets the same contemporary and rationalist language of the collection in a vertical storage solution with a strong visual identity. Designed for modern and luxurious interiors, it is an elegant expression of Italian design applied to modern living room furniture, combining functionality with refined aesthetics.

This high cupboard version features four hinged doors and is internally equipped with three glass shelves, offering generous and well-organized storage while maintaining a light interior. The metal base, available in various finishes, visually elevates the structure and reinforces the cupboard's slender and architectural profile.

This luxury cupboard offers the possibility of customizing the sides and back differently from the top and doors to create elegant contrasts. The iconic metal handle, inspired by the katana sword, integrates seamlessly into the design, adding a distinctive and elegant detail that enhances the overall composition. The Katana cupboard is ideal for luxury living room furniture sets where verticality, precision, and material sophistication play a central role.

Made in Italy.
