

Katana

Design: Signorotto+Partners

Description

Katana is a contemporary sideboard defined by minimalist, rationalist lines and a strong architectural presence, designed to enrich modern living room furniture with refined elegance and balance. Designed by Studio Signorotto +Partners, this piece expresses a sophisticated dialogue between materials, proportions, and functional details, making it ideal for luxury modern living room furniture settings.

The sideboard rests on a slender metal base, available in various finishes, which supports a stoneware or wooden top conceived as a refined tray. This tray effect continues along the sides and back, creating a visually light yet structured volume that enhances the perception of precision and order. This luxury sideboard offers the possibility of customizing the sides and back differently from the top and doors to create elegant contrasts.

A distinctive element of the Katana sideboard is its metal handle, inspired by the elegance and sharpness of the traditional Japanese katana. Designed to slide seamlessly into the specially conceived base, the handle adds a refined graphic accent that reinforces the sideboard's linear and contemporary character. With its harmonious proportions and premium finishes, Katana is perfectly suited for high end living room furniture compositions that seek clarity, functionality, and understated luxury. Made in Italy.
