

# Supernova

*Design: Signorotto + Partners*

## *Description*

The Supernova console expresses a refined balance between essential structure and softened form. Its painted metal rod support, linear yet visually light, defines a clean architectural presence that remains warm and welcoming. This single-top console fully reflects the distinctive design language of the Supernova family, conceived by Signorotto+Partners, where rigor and softness coexist in perfect harmony.

The black metal rod frame supports an oval top with gentle, fluid lines, reinforcing the console's understated elegance. The top is available in wood or stoneware, allowing for different material interpretations, and can be paired with a matt black lacquered wood panel that enhances depth and visual continuity. Carefully proportioned and minimal in expression, the Supernova console is designed to furnish contemporary living spaces with subtle character, timeless appeal, and a refined sense of design.

Made in Italy.
