

# Supernova

*Design: Signorotto+Partners*

## *Description*

The Supernova table reinterprets the refined order and geometric clarity of 1930s design with a contemporary architectural sensibility. Its distinctive convex rectangular glass top features gently rounded corners, creating a soft yet impeccably defined silhouette that echoes the curvature of the tubular structure beneath. This interplay of transparency and form allows the entire composition to appear light, precise, and meticulously balanced.

Supporting the top is a disciplined base crafted from round metal tubes, culminating in elegantly rounded heads that become a visible design element through the glass surface. The result is a harmonious tension between linear rigor and fluid softness.

Part of the broader Supernova family, this version embodies the collection's signature sophistication while offering versatility for a wide range of environments. Its clean geometry and premium materials make it a standout selection for contemporary furniture settings, particularly within luxury home furniture layouts or modern luxury living room furniture plans where refined craftsmanship and timeless elegance are essential.

Made in Italy.

## *Finishes & Materials*

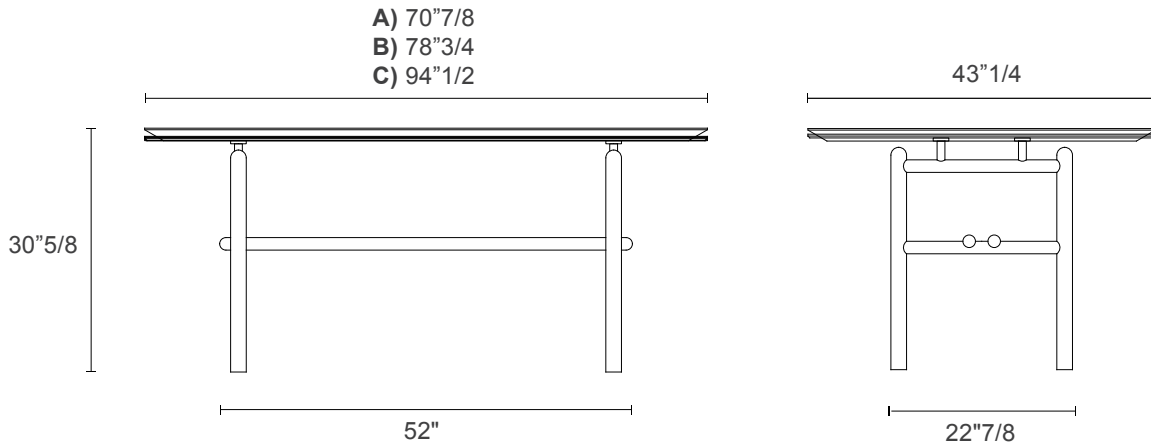

**Top:** Glass with a bevel in the lower part and glued bushings under the top, Stoneware matched with glass or CARB-02 certified particle board panel with lacquered or wood veneer top surface and 30° sloping perimeter edge.

**Base:** Metal or Lacquered Base.
