Description

The Hide wall-hanging bookcase redefines contemporary storage with an elegant balance of transparency, material richness, and architectural precision. Crafted with a solid blockboard ash wood structure, it features refined external veneer panels with MDF detailing, creating a seamless and sophisticated presence.

The pair of hinged tempered glass doors with soft-close UV-glued hinges reveal a luminous interior, enhanced by integrated warm white LED lighting discreetly built into the side panels. Horizontal brass profiles and refined frontal slats in wood or leather add a luxurious tactile contrast, while tempered glass shelves provide lightness and durability. A varnished steel blade subtly divides the elements, completing this modern bookcase designed to elevate living rooms, dining areas, and design-forward interiors. Made in Italy.
