

Kyoto

Design: Signorotto + Partners

Description

Kyoto is a distinctive metal bookcase that stands out for its architectural presence and refined balance between structure and material. Designed as a vertical metal framework that embraces horizontal wooden shelves, it creates a striking dialogue between solidity and lightness, making it a focal element within modern living room furniture compositions.

Conceived as a double-sided, freestanding bookcase, Kyoto is ideal for placement at the center of the room, where it can be appreciated from every angle and used as a subtle spatial divider. At the same time, its clean and measured design allows it to sit comfortably against a wall, enhancing the space without overwhelming it. This versatility makes Kyoto suitable for both residential and open-plan interiors.

Available with three or four shelves in different widths, the bookcase always features a metal structure paired with wooden shelves in veneer or lacquered finishes. The contrast between the vertical metal elements—both structural and decorative—and the horizontal wooden surfaces introduces rhythm, texture, and visual depth. Despite this interplay of materials and movements, Kyoto maintains a formal cleanliness and a controlled, contemporary elegance, positioning it naturally within high end living room furniture and modern contemporary living room furniture environments. Made in Italy.

Finishes & Materials

Structure: Self-supporting double-sided metal.

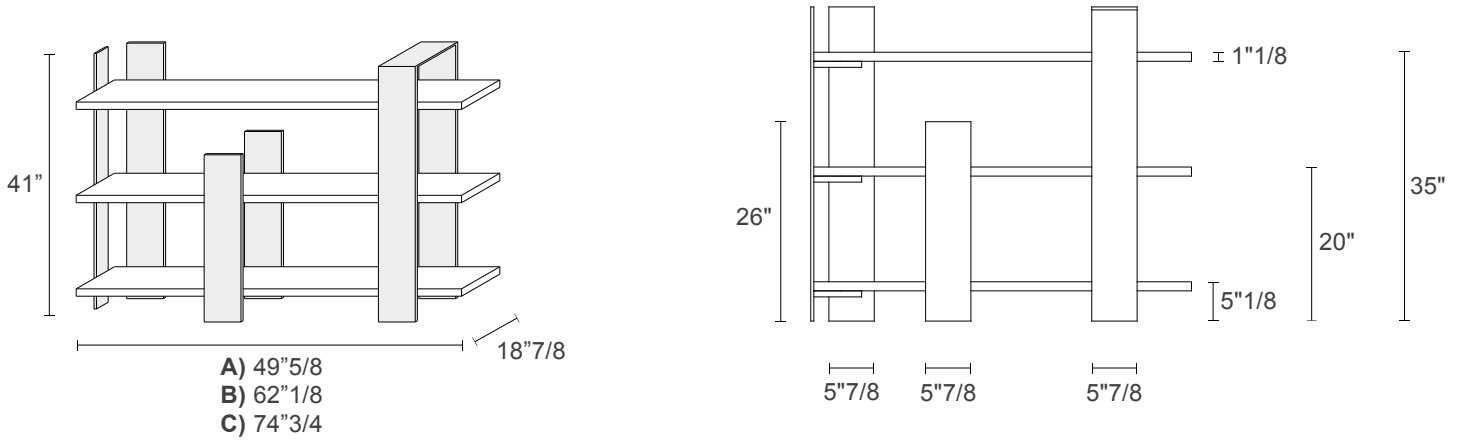

Shelves: CARB-02 certified wood particle board panels in Matt/Glossy Lacquered, Wood, Up Surface and Textured finishes.
