

Lama

Design: R&D Dallagnese

Description

The Lama dresser is part of a refined family of storage furniture defined by a strong monolithic presence and a rigorously minimalist aesthetic. Its compact volume and precise proportions create an architectural look that enhances contemporary interiors, making it an elegant addition to modern living room furniture compositions as well as sophisticated sleeping areas.

The front of the dresser is deliberately clean and uninterrupted, with drawers that appear to rest directly on the floor. This visual effect is achieved by concealing the feet just above the base, reinforcing the sense of solidity and continuity. The absence of visible frames or handles emphasizes the purity of the design and highlights the quality of the materials and finishes.

Functionality is ensured by the distinctive opening system: a vertical metal groove profile integrated on both sides of the dresser. This refined technical detail allows the drawers to be opened easily by inserting the fingers, while preserving the essential, linear appearance of the front. Completed by a refined top available in elegant finishes, the Lama dresser combines architectural clarity, understated elegance, and practical design, positioning it naturally within high end bedroom furniture and modern environments. Made in Italy.

Finishes & Materials

Top: Large stoneware slabs cut randomly, therefore not identical in the various top sizes. Or wooden particle-board panels in Matt/Glossy, Wood, Up Surface and Textured finishes.

Structure & Fronts: Wood particle-board panels, melamine laminated, lacquered or wood veneered and varnished.

Drawers: Wood particle-board panels with leather-effect melamine finish.

Easy-slide concealed metal runners, 66,14 lb (30 kg) dynamic load capacity. “Blumotion” soft closing mechanism with height adjustment system.

Opening: With side groove grip, fixed to the side panel, in epoxy powder-coated aluminum varnished in all the metal finishes.

Feet: Metal, concealed under the base. It allows a 3/8” height adjustment from the inner part of the unit.
