

Wrap

Design: Signorotto + Partners

Description

Wrap is a modern linear sideboard that reinterprets minimalism with subtle character and refined material contrasts. Designed for those who appreciate discretion and balance, its clean geometry is enriched by a distinctive stoneware top that extends seamlessly over the sides and partially onto the front, creating a sophisticated tray effect. This architectural detail introduces depth and visual movement without compromising the sideboard's calm, ordered appearance.

Available with two, three, or four doors, Wrap is defined by its unique material composition: the stoneware finish is used consistently on the top and on one outer front door, while the remaining doors are crafted in wood. This deliberate asymmetry creates a refined sense of discontinuity at top height, where the stoneware surface appears slightly recessed and the wooden sides and fronts subtly surpass it. The result is a sideboard with a contemporary, sculptural identity, ideal for modern living room furniture and luxury living room furniture sets that favor understated elegance. Made in Italy.
