

Volum

Design: Snøhetta

Description

Volum expresses the elegance of simplicity through a family of lamps whose forms are consistent yet subtly distinct, allowing them to interact in poetic compositions and deliver soft, all-round illumination suited to a wide range of uses. Designed in collaboration with the architectural firm Snøhetta, the collection conceals a refined technical complexity beneath its essential appearance. Each lamp pays tribute to traditional glassblowing, a process that gives rise to naturally imperfect forms and a unique visual depth. The diffuser consists of blown glass spheres with a glossy white finish, carefully crafted to diffuse light evenly and comfortably. Volum is available in four diameters offering flexibility in scale while maintaining a cohesive aesthetic language. Made in Italy.

Light bulbs not included.
IP20. Energy efficiency D.
Dimmable. Dimmer switch on the cord.
