Indoor / 3d Textured Vinyl

EWC – Essential Wallpaper

3D textured vinyl wallpaper which explores surfaces through engravings, embossing and metallic elements.

Essential wallpaper is the universe of 3d vinyl that enhance the sensory power of engravings, metallic inlays and relief textures. Suitable for indoor applications and humid environments thanks to its perfect washability, it is available in rolls ready for shipment.

Geometric progression, graphisms and abstract patterns identify a collection that makes repetition its hallmark, embellishing walls with three-dimensional details. The colors and patterns are pre-defined, making the collection available for immediate delivery. Each wall becomes a wall of expressiveness characterized by high resistance to impact and time.

Living areas, bedrooms, lobbies, stairwells, waiting rooms, co-working spaces - these are only some of the possible uses. But, thanks to its perfect washability, Essential wallpaper is also ideal for environments such as wellness centers and fitness areas. The whole collection meets the requirements of the Indoor Air Comfort Gold test plan and the French VOC A+ regulation.

Intended use:

Interiors: Living areas, bedrooms, lobbies, stairwells, waiting rooms, co-working spaces. Each wall becomes a wall of expressiveness characterised by high resistance to impact and time.

Spa & Gym: Textures, three-dimensional textures and embossing with metallic effects transform repetition and materiality into decorative elements of great value, also ideal for environments such as wellness centres and fitness areas.
