### OUT SYSTEM

Technical wall covering for outdoor areas.

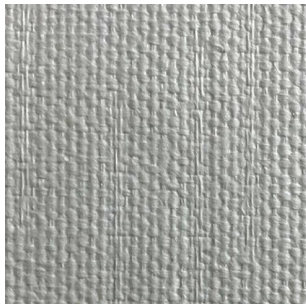

**OUT SYSTEM is the very first and unique wall covering for outdoor walls, such as patios, terraces and facades. It combines a high decorative effect with an excellent resistance to rain, yellowing, tears and abrasion while granting an impressive visual impact.**

OUT SYSTEM is a true technical wall covering system with a maximum thickness of approx. 1/25 in., consisting of a fiberglass fabric, a sanitizing layer and transparent finishes. It can be applied to concrete walls, cement plaster, plasterboard for exteriors and other structural materials, to add a valuable and unconventional new look. Specifically developed and implemented for exterior walls, OUT SYSTEM is suitable for use in different contexts: residential, industrial, commercial and hotels spaces.

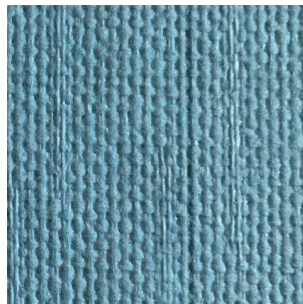

#### Intended use:

Patios, terraces, facades

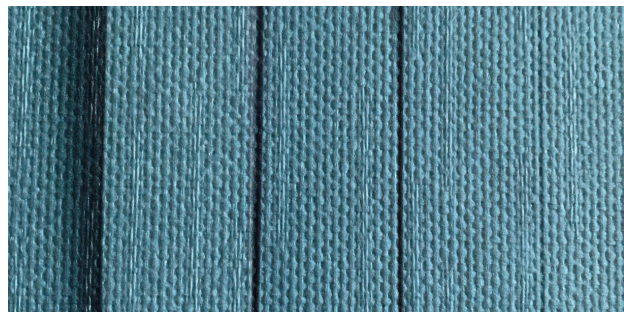

Wallpapers leave the house and conquer outdoor spaces too. With the OUT System collection, creativity and aesthetic value finally become possible even outdoors.
