

Allaperto *Design: Matteo Thun & Antonio Rodriguez*

Description

This large-scale piece features two individual Allaperto Swing armchairs suspended from a single, robust free-standing frame. The frame is constructed from high-quality metal and natural teak, providing an earthy, warm contrast to the technical materials of the seats. The self-supporting structure allows for total flexibility in placement on lawns or terraces without needing structural overhead support. Engineered for high-performance durability across varied climates, this piece is proudly Made in Italy.
