

## Erice D

*Design: Giorgio Bonaguro*

### *Description*

Erice D is a sculptural sideboard crafted in solid ash wood, designed to bring architectural character and refined functionality to contemporary interiors. Defined by wide monolithic legs and beveled tops combined in an apparently irregular composition, it echoes the geometric interlocking of cyclopean walls, creating a bold yet harmonious aesthetic.

Available with a wooden or marble top, Erice D features layered materials that enhance depth and visual dynamism. A discreet internal secret partition hidden behind the central leg adds practical storage while preserving the purity of its design.

Generous in size and meticulously crafted, this designer sideboard blends premium materials, Italian craftsmanship, and timeless elegance for living rooms, dining areas, or sophisticated spaces. Made in Italy.

### *Dimensions*

82"5/8W x 19"5/8D x 31"1/2H
