

Ladybug

Design: Matteo Zorzenoni

Description

Ladybug is a generously sized fixed dining table defined by rounded, flowing lines and a refined sculptural presence. Its cylindrical legs rise seamlessly into the top, evoking the delicate wings of a ladybug and creating a distinctive graphic silhouette that feels both soft and architectural. The result is a harmonious balance between elegance and contemporary design.

Crafted with 2 cylindrical bases in ash wood or lacquered finish, Ladybug is available with ash wood, lacquered, or marble top to suit a variety of sophisticated interiors. When paired with a marble top, the undertop support is lacquered to match the selected marble, ensuring visual continuity and meticulous attention to detail. A statement dining table that combines premium materials, timeless refinement, and modern Italian design. Made in Italy.
