

Pebble

Design: Giorgio Bonaguro

Description

Pebble is a refined collection of designer coffee tables inspired by the organic, irregular shapes of stones gently shaped by water. Defined by soft contours and fluid silhouettes, these low tables bring a natural yet contemporary elegance to modern interiors. Available in three different heights and multiple top sizes, the collection offers exceptional versatility for living rooms, lounges, and sophisticated spaces.

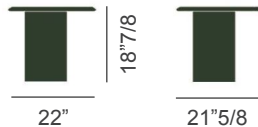

Crafted with a lacquered base and a choice of lacquered or marble tops, Pebble allows complete customization through a wide range of finishes and color combinations. From the compact Pebble S, distinguished by its playful proportion between base and top, to the generously sized M and L versions, each piece is remarkably pleasant to the touch and visually harmonious. Perfect as standalone accent tables or combined into sculptural compositions, this collection creates a dynamic interplay of shapes, heights, and premium materials. Made in Italy.
