

Dix Bougies

Design: Studio Odile Decq

Description

The Dix Bougies Suspension Lamp by Luceplan is a contemporary chandelier that combines architectural precision with poetic light diffusion. Defined by a long horizontal aluminum extrusion intersected by four asymmetrical elements, its composition appears dynamic and spontaneous while remaining technically exact. The internal structure discreetly conducts electricity through the arms, delivering power directly to the integrated LED light sources at each end. These LEDs are enhanced by refined diffusers crafted from an advanced paper material made of cellulose and synthetic fibers. The result is a warm, soft illumination that recalls the glow of candles while offering the efficiency and longevity of modern LED technology. Ideal for dining rooms, living areas, and upscale contract spaces, Dix Bougies functions as both a sculptural centerpiece and a high-performance lighting solution. Its linear suspension design, lightweight aluminum frame, and diffused LED light make it perfect for modern interiors seeking elegance, innovation, and energy-efficient illumination. Made in Italy.

UL Certified.

Fixture fitted for direct assembly on normally inflammable surfaces.

Electrical safety device with additional protective wire (earth) connected to metal structure of lamp.

Device with protection against electric shock based on very low voltage supply. No higher voltages are produced.

Dix Bougies

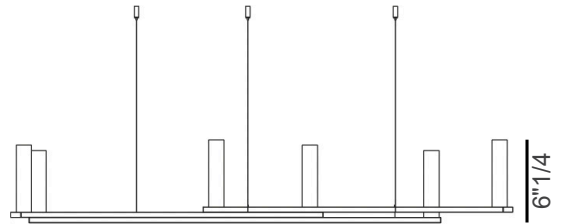

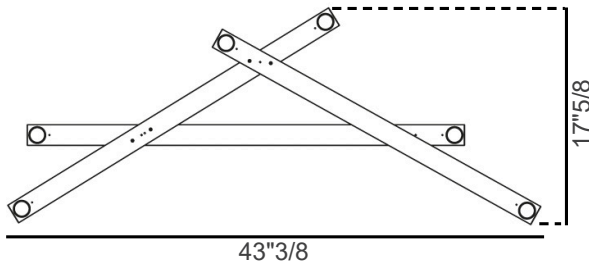

Dimensions

PETITE: 43"3/8W x 17"5/8D x 6"1/4H

BIG: 76"W x 29"3/8D x 6"1/4H

Cable max. suspension: 196"7/8 | Rectangular Canopy Size: 9"1/8W x 5"D x 2"H
