

Marantego

Design: Leo De Carlo

Description

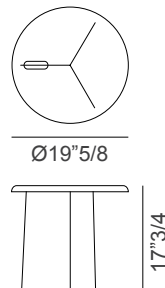

A refined statement of luxury coffee table design, this piece blends artisanal glass craftsmanship with contemporary elegance. The round top is crafted from two layers of baked glass with irregular edges, creating an organic and fluid silhouette that highlights the distinctive character of handmade furniture.

Finished with a sophisticated dégradé effect that transitions from warm bronze to transparent crystal, the glass surface is enhanced by partial silvering on the back, adding depth and luminous reflections. The molten glass top rests on a sleek iron sheet structure with a polished nickel finish, offering a refined contrast between delicate transparency and architectural strength. Available in three different sizes, Marantego can be used individually or combined to create layered compositions, making it a versatile and elegant centerpiece for refined living spaces and contemporary interiors. Made in Italy.
