

Gemma

Design: Di_Studio

Description

Gemma is a sideboard with a strong character, designed to introduce an artistic sense of rationalism into contemporary interiors. Its sculptural form balances the lightness of an origami fold with the precision of Euclidean geometry, creating a composition defined by clean angles and harmonious proportions. The result is a striking piece of luxury brand furniture that combines architectural rigor with refined elegance.

Gemma transforms the surrounding space with its distinctive visual presence. Its faceted surfaces capture light in subtle variations, emphasizing depth and movement. This duality between structure and lightness gives the sideboard a sculptural identity that goes beyond pure functionality.

Both storage solution and artistic statement, Gemma weaves timeless lines between past and future. Perfect for sophisticated interiors and curated modern luxury living room furniture compositions, it brings personality, balance, and contemporary Italian design sensibility to any refined environment.

Made in Italy.
