

## Itoku

*Design: Lato x Lato*

### *Description*

Itoku is inspired by the ancient tradition of the screen, reinterpreted with a contemporary vision that enhances both function and aesthetics. With its refined oriental character, this distinctive piece creates privacy while generating elegant three-dimensional backdrops, embodying the expressive versatility of modern designer furniture.

The design is enriched by the integration of a storage unit, transforming the screen into a multifunctional element that is fluid, innovative, and highly adaptable. Its clean, rational lines are complemented by refined finishes, highlighting the balance between simplicity and sophistication typical of luxury Italian furniture. This thoughtful combination of form and function elevates the piece beyond its traditional role, offering both decorative and practical value.

Ideal for both residential and contract environments, Itoku blends seamlessly into lavish interiors as well as contemporary settings. Perfect for curated spaces and elegant luxury home furniture compositions, it adds depth, character, and architectural interest while maintaining a harmonious and timeless design language.

Made in Italy.
