

Olly

Design: Carla Palù

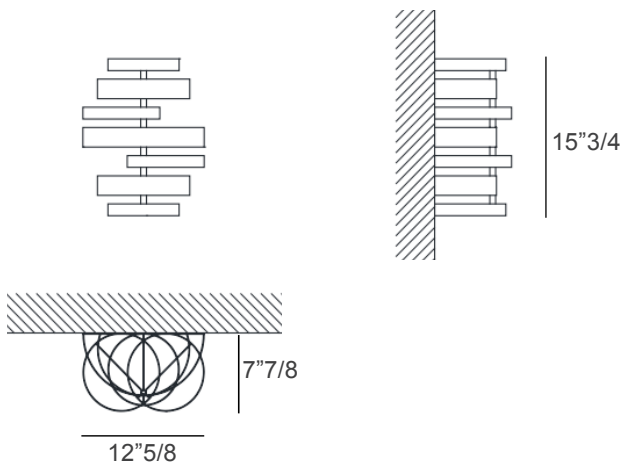

Description

Olly translates the balanced geometry of the Olimpia chandelier into a refined wall-mounted composition. Its asymmetrical circular elements, sharing a common center, lean elegantly against the wall, creating a sculptural presence that enhances sophisticated interiors. Crafted in stainless steel, the non-concentric circles develop around a central axis, generating elongated and harmonious shadow effects. This dynamic structure produces both downward and diffused illumination. Olly is equipped with two G9 light sources (bulbs not included), with LED bulbs recommended for optimal efficiency. CE certification ensures compliance with safety standards, while the compact wall-mounted format offers versatile placement. The refined proportions and sculptural light distribution make Olly an ideal element for sophisticated contemporary lighting fixtures applications in residential and contract environments.

Made in Italy.

Dimensions

12"5/8W x 15"3/4H x 7"7/8D - Cod. BOLL40G

Finishes & Materials

Structure: Stainless steel with galvanic finishing.
