

Tiam

Design: Claudia Campone & Martina Stancati

Description

Tiam is a poetic design piece inspired by the intensity of a first encounter — a fleeting yet powerful moment that captures emotion, connection, and discovery. Its concept translates this feeling into a sculptural composition, where materials and forms interact in a refined dialogue. The result is a distinctive element of luxury brand furniture that elevates interiors with both meaning and presence.

The majestic travertine base anchors the design with architectural strength, acting as a solid monument from which the curved mirror emerges. This harmonious insertion creates a striking balance between mass and lightness, highlighting the interplay between the stone's structural solidity and the fluid softness of the reflective surface. The composition expresses a refined contrast, turning opposing materials into a cohesive visual statement.

On the opposite side, a fabric-wrapped surface adds warmth and tactile appeal, inviting interaction while enhancing the sensory dimension of the piece. Perfect as a statement accent within luxury modern interiors, Tiam functions as both decorative object and artistic focal point, embodying contemporary elegance with a sophisticated emotional narrative. Made in Italy.

Finishes & Materials

Base: Open pore Marble.

Structure: Plywood.

Frame: Metal.

Surface: One side with extra-clear mirror and on the other side Fabric covered.
