

Tiam

Design: Claudia Campone & Martina Stancati

Description

Tiam Mirror Pot is conceived as a poetic design object that transcends traditional function, transforming into an immersive experience where form and meaning coexist. Suspended between what is seen and what is felt, it redefines the boundaries between mirror and vessel, embodying the expressive language of contemporary designer furniture.

This piece expands the narrative of the Tiam collection, introducing a refined table presence where reflection and nature intertwine. The mirrored surface, both sharp and enveloping, rises from a solid base to welcome flowers, leaves, and organic elements, amplifying light and spatial perception. This interplay between materials and concept reflects the innovation and material sensitivity characteristic of luxury Italian furniture.

Elegant and evocative, Tiam Mirror Pot enriches interiors with a sculptural and emotional dimension. Perfect for curated spaces and sophisticated luxury home furniture settings, it serves as both a functional object and a decorative statement, bringing together design, nature, and reflection in a harmonious composition.

Made in Italy.
