

CUSCO

Design: Matteo Zorzenoni

Description

Designed as a refined modular seating system, the Cusco sectional draws inspiration from the powerful geometry of the cyclopean walls found in ancient Latin American cities. Its generous, geometric modules interlock like architectural elements, creating a dynamic composition of seats, joints, and backrests that adapt effortlessly to a wide range of interior layouts. The result is a contemporary sectional sofa that blends sculptural design with exceptional comfort, for both compact and spacious living environments.

Comfortable and inviting when viewed from the front, the silhouette reveals a striking architectural character from the side, giving the Cusco sectional a distinctive visual impact. Crafted with a structure in EPA-certified plywood, fir, and hardboard, it features padding in open-cell polyurethane and Dacron layers, supported by elastic straps to ensure lasting comfort and durability. Upholstered in premium leather or fabric, this modular design embodies the perfect balance between innovation, functionality, and sophisticated modern aesthetics. Made in Italy.

Dimensions

189"3/4W x 96"D x 27"1/8H

Seat height: 17"3/8
