

CUSCO

Design: Matteo Zorzenoni

Description

Designed as a versatile modular seating system, Cusco is inspired by the powerful geometry of the cyclopean stone walls of ancient Latin American cities. Its generous, geometric volumes fit together like architectural blocks.

Comfortable and welcoming from the front, the design of this 3-seater sofa reveals a bold and sculptural character from the side, creating an unexpected visual impact. Combining innovation, functionality, and refined aesthetics, this modular sofa adapts effortlessly to contemporary interiors while offering a perfect balance of comfort, technology, and design.

The structure is crafted in EPA certified plywood, fir, and hardboard, padded with open-cell polyurethane and Dacron layers, and sprung with elastic straps to ensure lasting comfort and durability. Upholstery is available in premium leather or fabric coverings to suit a wide range of interior styles. Made in Italy.
