

Paw

Design: Matteo Zorzenoni

Description

Designed to combine elegance and functionality, Paw is a refined bookcase that highlights the beauty of natural materials and clean architectural lines. The central structure in ash wood features linear shelves that provide practical and stylish storage for books, décor, and everyday essentials, creating a balanced and organized display.

The design contrasts with a distinctive base supported by slightly conical feet, a subtle detail that enhances the piece's formal clarity and sculptural presence. Optional lacquered trays, drawers, storage units, and Vienna straw decorative panels enrich the composition, creating dynamic visual patterns through the interplay of solids and voids. This thoughtful combination of storage solutions and refined craftsmanship makes Paw a sophisticated bookcase ideal for contemporary living spaces. Made in Italy.
