

Slow

Design: Simone Bonanni

This image corresponds to composition Slow XL

Description

Slow is a refined sectional defined by generous proportions, rounded lines, and a harmonious architectural presence. Designed with a wooden structure in EPA-certified plywood, fir, and hardboard, it features open-cell polyurethane padding and Dacron wadding for superior comfort, supported by elastic strap suspension. The rounded backrests are elegantly sustained by exposed ash wood or lacquered fiberboard supports, adding a distinctive graphic detail to its soft silhouette.

Conceived for maximum flexibility, Slow is composed of modular elements that combine effortlessly to create linear, island, open corner, or right-angle configurations, adapting seamlessly to both compact and spacious interiors. Metal connecting plates ensure stability, while upholstery options in premium leather, natural fabrics, and soft wools allow full customization to complement the chosen leg finishes. A contemporary modular sofa designed for endless compositions, where comfort, craftsmanship, and sculptural elegance meet. Made in Italy.
